변경/삭제/리뷰 조회

# Backend Admin 실행화면 (특정 게임에 대한 리뷰 조회)

Review			
<a href="#">Add Review</a>			
Rating	comment		Action
10.0	MASTERPIECE!!		<a href="#">Delete</a>
8.5	Before I say anything else I want to clarify that my rating is probably pretty biased as I am a huge fan of the Halo franchise, and you can see that 343i clearly are fans themselves.		<a href="#">Delete</a>
10.0	This collection is a paradise for fps. Great value , great replay value..... 10/10 is the rating it deserves.....		<a href="#">Delete</a>
10.0	I just played 2 hours or so of Halo 2 and...how can you not love this collection? This is how remakes should be done, there are 4 full great games and multiplayer content for life. This is a must have for any gamer!		<a href="#">Delete</a>

연관된 Review 삭제, User와의 JoinTable 데이터 삭제 쿼리 생성

# User 게임 레코드 조회시 Hibernate 내부 동작

```
@ManyToMany(fetch=FetchType.LAZY,  
            cascade= {CascadeType.ALL})  
@JoinTable(name="game_user",joinColumns=@JoinColumn(name="user_id"),  
inverseJoinColumns=@JoinColumn(name="game_id"))  
@JsonIgnore  
private List<Game> games;
```

fetch 타입이 LAZY 이므로  
유저정보에 대한 조회가 일어날때, 게임정보를 조회하기 위한 별도의 쿼리가 발생하지  
않는다.

```
Sep 04, 2020 11:51:49 AM com.gametodoeyBackendClient.service.UserServiceRestClientImpl getUsers  
INFO: in getUsers(): Calling REST API http://localhost:8080/gametodoeyBackend/api/users  
Hibernate: select user0_.id as id1_3_, user0_.email as email2_3_, user0_.first_name as first_na3_3_,
```

# User 게임 레코드 조회시 Hibernate 내부 동작

```
@ManyToMany(fetch=FetchType.LAZY,  
            cascade= {CascadeType.ALL})  
@JoinTable(name="game_user",joinColumns=@JoinColumn(name="user_id"),  
inverseJoinColumns=@JoinColumn(name="game_id"))  
@JsonIgnore  
private List<Game> games;
```

fetch 타입이 LAZY 이므로  
유저게임 정보에 대한 조회가 일어날때,  
game\_join 테이블과 game 테이블의 inner join이 발생
